

We are here.

Our primary goal at **CarePoint Health Christ Hospital** is the safety of our patients, families and employees. We closely monitor the constant changes in Covid-19 guidelines and make periodic changes to respond to the challenges and uncertainties resulting from this situation.

We have been at the forefront to keep our community safe during this pandemic. While we remain vigilant and prepared, we need to move towards normal operational activities at our hospital. It is important that you feel safe seeking the health care that you need. That is why we perform temperature checks for all visitors, maintain social distancing in all outpatient areas, symptom screen our employees, maintain separate Non-Covid patient floors and use state-of-the-art UV light machines to disinfect the rooms. We want you to know that there are many people working behind the scenes to ensure your safety, as well as the safety of our care team members.

To learn more about what you can expect from Christ Hospital and our level of preparedness, visit our website: www.carepointhealth.org.
